Forest & Linen

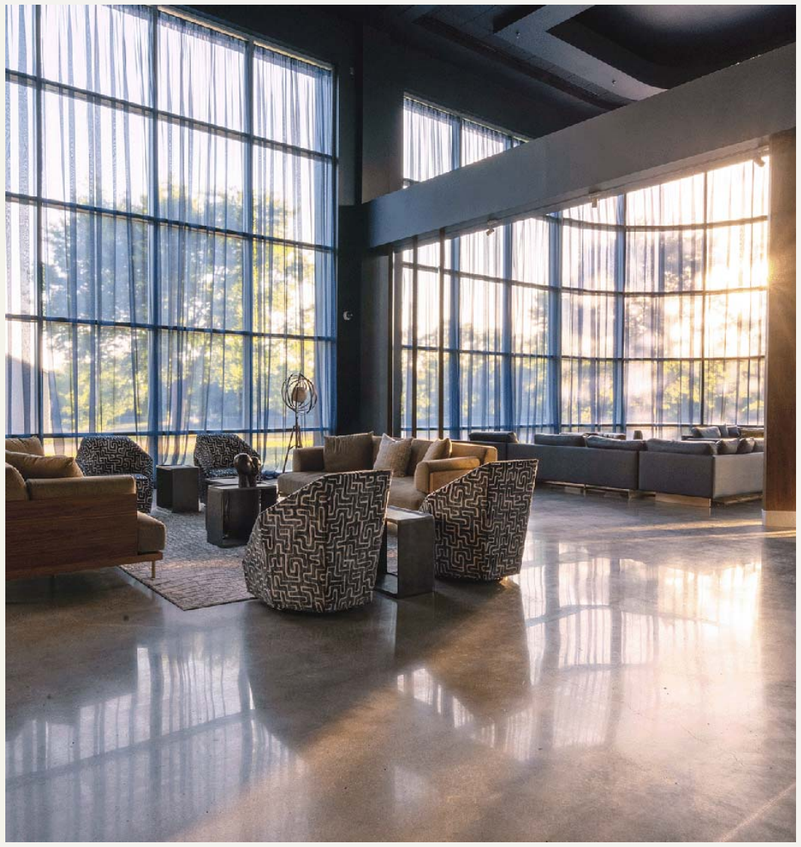

Infrastructure that belongs to its landscape.

SPRING HILL, TENNESSEE

Worldwide Stages

A regenerative future
for a working campus

Investor discussion
September 2026

INTENDED IMPRESSION

Forest green references vegetation. Linen brings in the warmth of a physical place. Together they put the campus and its regenerative ambition first.

WHEN TO USE IT

Lead with the land and the long-term campus vision.

COLOR MEANINGS

- Nature
- Technology
- People
- Capital

DATA CENTER INCOME

What a hall rents for

MARKET RENT, TENANT BRINGS THE COMPUTERS

$1.85M

per megawatt of computer load, per year

5 MW HALL

$9.3M

a year

10 MW HALL

$18.5M

a year

The same rent per gigawatt is about $1.85 billion a year. This campus is measured in megawatts, and the power on site sets the size.

Every lease of this kind had a large company guaranteeing the tenant. Rent is before the cost of the hall, and nothing is a forecast until power and a tenant are confirmed.

Applied Digital lease to CoreWeave, SEC 8-K, Jun 2025; TeraWulf lease to Fluidstack, SEC 8-K, Aug 2025

POWER

Power determines the scale

10 MW

Seller reported
Utility confirmation pending

Capacity
What can the utility deliver?

Timing
When can it support the first hall?

Cost
What upgrades and rates apply?

Seller capacity claim relayed on the 15 Sep call; no utility confirmation supplied

THE REGENERATIVE APPROACH

Technology as an ethic

Water	Reduce fresh water demand.
Power	Measure and manage energy use.
Heat	Assess useful destinations for waste heat.
Performance	Publish results against a baseline.

Technology choices and delivery partners remain to be agreed.

Micki Meng's working concept; technical scope to be developed with qualified partners

Design interpretation, informed by research on learned color associations.

Palmer & Schloss, 2010 [source]

Cobalt & Porcelain

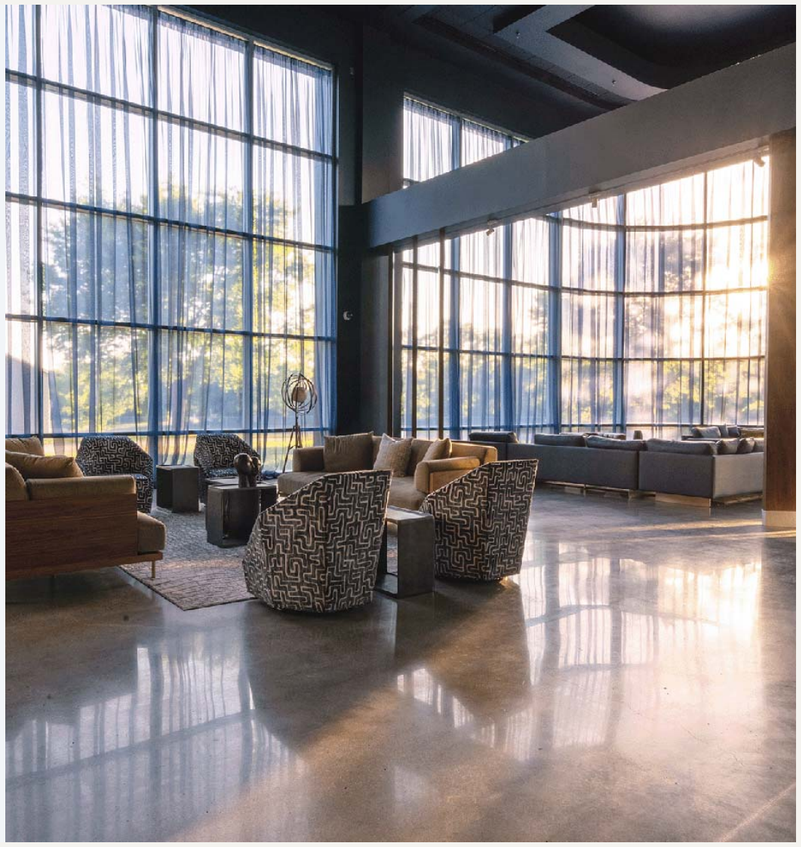

A considered approach to complex infrastructure.

SPRING HILL, TENNESSEE

Worldwide Stages

A regenerative future
for a working campus

Investor discussion
September 2026

INTENDED IMPRESSION

Deep blue gives the engineering story a clear identity. Blue has supported perceived competence in controlled brand studies; the pale field keeps the numbers prominent.

WHEN TO USE IT

Lead with power, planning and the investment discussion.

Technology as an ethic

Water	Reduce fresh water demand.
Power	Measure and manage energy use.
Heat	Assess useful destinations for waste heat.
Performance	Publish results against a baseline.

Technology choices and delivery partners remain to be agreed.

Micki Meng's working concept; technical scope to be developed with qualified partners 13

Brand research informs the intent; the exact palette has not been tested.

Labrecque & Milne, 2012 [source]

Indigo & Pearl

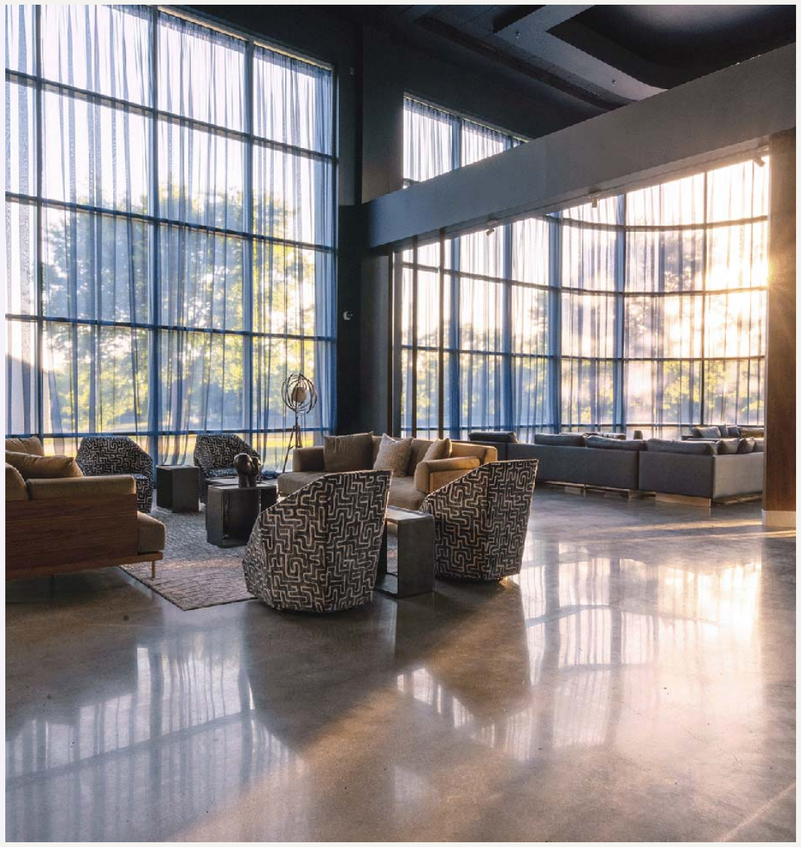

A distinct identity for the next chapter of computing.

SPRING HILL, TENNESSEE

Worldwide Stages

A regenerative future
for a working campus

Investor discussion
September 2026

INTENDED IMPRESSION

Muted indigo gives computing its own visual voice. Pearl keeps the setting light, while green and rose connect technology to nature and people.

WHEN TO USE IT

Lead with a new model for how a data center fits into a campus.
